It shall be the intent of this Board that the Building and Construction Committee, assisted by the Zoning Board of Appeals (ZBA), described in Chapter 22, Article XIII, shall be the committee responsible for administering the standards and rules contained herein. To accomplish this task, the following guidelines are established:

A. In order that the public locate goods, services and facilities in the Village without difficulty or confusion, and to maintain a high quality of development throughout the Village, it is the intent of this Chapter to encourage excellence in the design of signs, to promote a sign's activity to which it pertains, and to express the identity of the proprietors of the premises on which such signs are located. This Chapter is further intended to reduce visual confusion, restrict signs which increase the possibility of accidents by distracting attention, obstructing vision or which otherwise adversely affect the public health, safety or welfare.

B. The applications governed by this Chapter shall be reviewed by both the Building and Construction Committee and the ZBA for the Village. The decisions of both groups shall be in an advisory capacity.

C. The Building and Construction Committee, after receiving the ZBA's review of the applications, shall forward both recommendations to the Village Board, which in turn shall make the final and only binding decision as to each application.

Sec 12-12. COMMITTEE - POLICY

To assure that the intent of this Chapter is realized, it shall be the policy of both the Building and Construction Committee and the ZBA by way of their reviews to:

- C. Encourage excellence in the design of signs throughout their acceptance of appropriate innovative and imaginative concepts;
- D. Encourage competition toward attractiveness in signs and discourage the type of competition which produces signs that are counterproductive to the intent of this policy and program; and
- E. Give appropriate recognition to projects which exhibit outstanding design merit.

Sec. 21-13. COMMITTEE - STANDARDS AND CRITERIA FOR REVIEW.

The following factors and characteristics which relate to the safety and appearance of signage shall govern both Committees' evaluations of design submittal. Criteria and standards for review shall include:

- A. Projects which include a number of signs and graphics shall have an overall plan;
- B. Signs and graphics shall have a harmonious relationship with nearby signs, buildings and the neighborhood, and shall be designed so as not to affect adversely adjacent structures. In this respect the sign shall be related to its building, structure and neighborhood in terms of size, shape, material, location, lighting, and landscaping, if applicable;
- C. In their deliberations the Boards shall consider, among other things, the sign area allowances provided herein as the maximum allowance, and if in their determination the size of the proposed sign(s) is out of proportion or scale to the building or to other buildings or signs in the surrounding area, then the Board may reduce the allowable sign area at their discretion;
- D. External lighting shall be arranged/located in such a manner so as to ensure the light source is either screened from view, or that the light source is not distracting or obtrusive.
