PRELIMINARY ENVIRONMENTAL IMPACT DETERMINATION – PUBLIC HEARING

- Dan Pepin read the following:

The Village of Orangeville is holding this public hearing to discuss its intentions for securing funding from Illinois Environmental Protection Agency (IEPA) for water system improvements projects. The water system improvements project includes the construction of well houses, well No.1 rehabilitation, water main improvements and looping and water tower improvements. The purpose is to ensure that the Village of Orangeville is able to supply a drinking water quality and quantity for the community and its customers. Engineering evaluation 2022 had significant deficiencies including bacteriological samples not passing testing. The proposed improvements are being completed to address and improve water storage, quality, pressure and flows within the Village's water distribution system. Prior to granting its approval of the proposed project and plan, the IEPA requires that the public be granted an opportunity to comment on the information presented. The Village of Orangeville is hereby making notice that the IEPA has issued a Notice of Intent to Issue a Categorical Exclusion for the proposed Water System Improvement Projects. A 10-day public comment period will commence and information on the proposed project and the IEPA Project Summary and Notice are available for public inspection at the Village Hall located at 301 South East Street, Orangeville, IL 61060, 815-789-4416, by appointment to view the information. The project information can also be viewed online at the Village's website, <https://www.villageoforangeville.com/>
